NEW

SAHPS - The New Health Planning app for Beef Farmers

SRUC

- The SAHPS app enables farmers to collect and record data as events occur and allows them to share the data with their vet immediately.

- The SAHPS app is linked to the existing SAHPS (Animal Health Planning) and BCMS (British Cattle Movement System) software.

- Internet is not required to record events however all data can be uploaded to SAHPS and BCMS when Wi-Fi and/or mobile phone data become available.

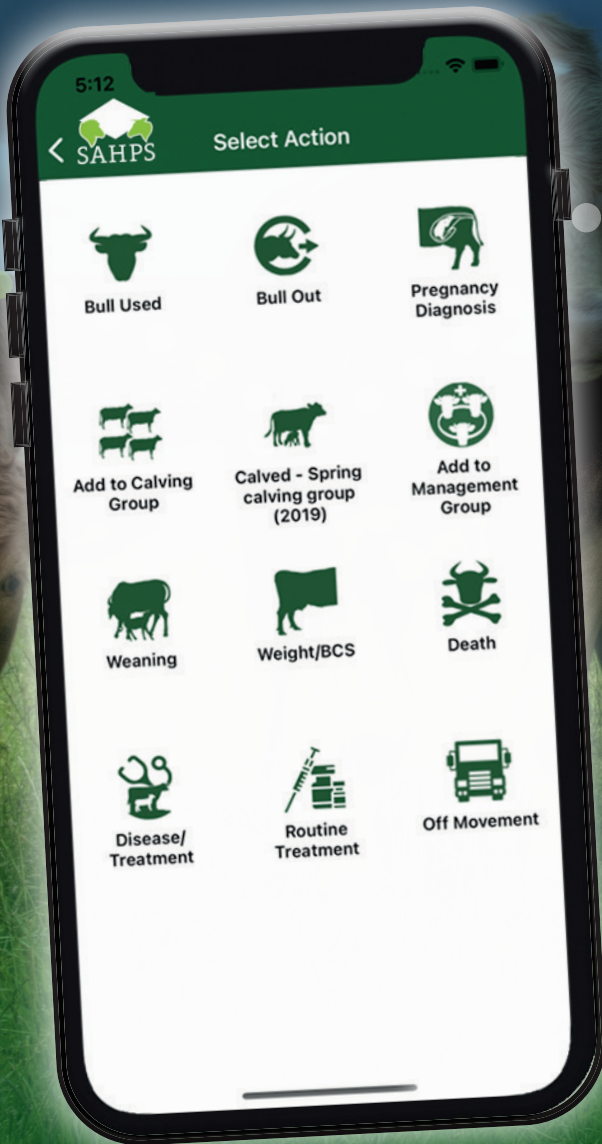

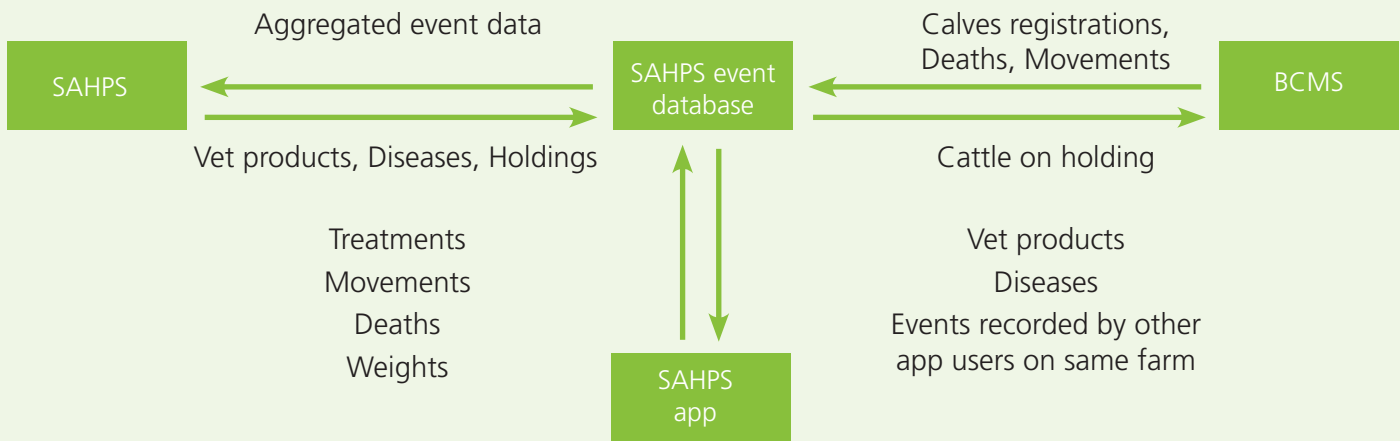

SAHPS • PLAN • PREVENT • PROSPER

Key features:

- Download all cattle currently on holding through BCMS

- View animal details

- Record bulls in/out dates

- Record movements, births, deaths

- Send/receive information to/from BCMS

- Record pregnancy diagnosis results

- Record disease incidents

- Record treatment to create the e-medicine book

- Record animal's weight/BCS

- Record weaning information

- Record and save your data off-line

ANDROID APP ON **Google play**
