

PREMIUM SHEEP AND GOAT HEALTH SCHEMES

**MV/CAE, Johne's and EAE Submission Form for New Member
Stocked with Accredited Sheep: 1st Routine Periodic Blood Test**

Please return samples to: SRUC Veterinary Services,
Greycrook, St Boswells, TD6 0EQ

Information on this form will be stored and processed on a computer. SRUC Veterinary Services complies with the standards set by The Data Protection Act 2018 and GDPR.

Section 1:

Date of Test:

Veterinary Practice Name and Address	Client Name and Postal Address
Clinician:	CPH: NUMBER

Enter the first line of holding address(es) where MV/CAE accredited stock are kept:

Address 1		Address 2		Address 3		Address 4	
CPH		CPH		CPH		CPH	

Animals tested and Breeds:

Sheep: TOTAL numbers tested	MV	EAE
Goats: TOTAL numbers tested	CAE	EAE
Please list ALL BREEDS in your Accredited flock/ herd	SHEEP:	
	GOATS:	

Test type:

Test type	Number of animals tested	
New Member (stocked with Accredited Sheep) First Routine Periodic Blood Test. <i>**NOTE: If there is a non-accredited flock it requires to be sampled: See Page 12****</i>		
Non accredited 12 thin ewe screen		
Qualifying Tests Non Accredited flock/herd which is joining the Scheme	1 st	2 nd
Added Animals: Non Accredited Animals (Joining an accredited flock/herd)	1 st	2 nd
Added Animals from Accredited flock		
Other		

Section 2

Certificates cannot be issued if the tables below are incomplete

	MV/CAE Accredited (do not include stock listed as added animals above)				Stock to remain Non Accredited			
	Sheep		Goats		Sheep		Goats	
	Male	Female	Male	Female	Male	Female	Male	Female
Under 12 m								
12-17m								
18m and over								

Section 3A-MV/CAE ONLY

	Yes/No
Are all farm boundaries secured?	
Is there at least a 2 metre gap (sheep) or 3 metre gap (goats) at farm boundaries separating the holding from neighbouring holding(s). If no, please explain below what precautions are in place to stop contact with animals on neighbouring holdings.	
Are there any new holdings (since the last test) that the animals may be moved to and be kept at? If Yes, Has a premises check been performed for these holdings?	
Is the movement record book up to date?	
To the best of your client's knowledge has there been any contact with non accredited animals since the last test? If yes, have the correct procedures been followed?	
If you client performs AI/ET work and the recipients accredited?	
Are there non accredited animals on the same holding? If Yes, please complete Section 3B	

Section 3B

	Yes/No
Is there at least a 2 metre gap (sheep) or 3 metre gap (goats) separating accredited and non accredited animals?	
If animals are housed at any point is there separate accommodation available for accredited and non accredited animals?	
Is a seven day period left between grazing accredited and non accredited animals on the same pasture?	
Is there separate equipment available eg drenching guns, hypodermic needles, ear taggers etc to be used for accredited animals only?	
Are there separate handling facilities available for accredited and non accredited animals? If not, is your client aware of the requirements for disinfection etc of shared facilities?	
Is your client aware of the rules surrounding transportation of accredited and non accredited animals?	
Has the 12 animal cull ewe screen of non accredited animals been performed? If animals not sampled please explain why below:	

Any further comments?

Section 4

Number of flocks (see definition below) on holding Please see page 6 (MV) and 7 (EAE) to calculate how many animals in each flock require to be tested for Routine Periodic Blood Test (RPBT).	
Number of groups (see definition below) within each flock. Please ensure animals from each group are tested as part of your RPBT.	

Definitions

'Flock' A batch of animals that are managed in complete isolations and have had no contact with any other animals on the holding for 12 months or more, including other flocks of accredited animals.

'Group' A group of animals within a flock that have been managed separately for a minimum of two months other than mixing with other groups for management practices such as lambing, tupping and routine treatments for example.

Section 5 – ADDED ANIMALS

- Please list ALL non home-bred animals added to the MV/CAE/EAE Accredited flock/herd since the last test **THAT HAVE NOT ALREADY BEEN TESTED** as added animals (accredited or non-accredited). **Note, animals must have been on your farm for a minimum of 6 months prior to testing.**
- Please note that the Ear number is mandatory

	Ear No	Age	Breed	M/F	**MV/CAE Status At purchase	Date of Purchase	Tested since last RPBT Y/N	Previous Owner name and Address
1								
2								
3								
4								
5								
6								
7								
8								
9								
10								

* MV/CAE Status at Purchase: Accredited = A, Non Accredited = NA, Supervised = S

If there is insufficient room to clearly detail all animals above please note on a separate sheet and attach to this form.

Section 6

Declaration by Owner and Veterinary Surgeon

- 1 The total stock numbers of all Scheme and non Scheme animals on the premises is recorded overleaf and details of all animals added since the last test are listed above (or attached).
- 2 I have followed the rules and conditions of membership since joining the scheme and agree to continue to abide by these rules and conditions. All information is a correct and true record.
- 3 I allow these samples to be used in the development of additional serological tests. Testing would be done on an anonymous basis and results will remain confidential.
- 4 I agree that a summary of the overall results will be provided when the results are reported. Individual results will only be reported for any sheep or goats that are found to be positive on individual testing.

Signed: **Owner/Manager**

- 1 I have explained the rules of the Scheme(s) regarding farm security to my client who, to the best of my knowledge, is complying with the Rules and Conditions of the MV/CAE/EAE Accreditation Scheme. If I have any concerns that do not in my opinion constitute a non compliance of rules I have recorded them in the section 3.
- 2 I have examined the movement book(s) and all sheep and goats entering the premises are recorded on this form or attached sheet.
- 3 I have blood sampled, according to the Rules and the information supplied to me by the owner, the appropriate number of sheep/goats as recorded on the attached form.

Signed: **MRCVS**

THIS FORM IS INVALID IF THIS SECTION IS NOT SIGNED BY THE OWNER AND VETERINARY SURGEON

Notes for Guidance: MV/CAE Accreditation Scheme

Please see Rules and Conditions for full information

- 1. New Routine Periodic Blood Tests (Farm stocked with Accredited Animals) – Test all animals over 12 months of age** (unless more than 55 animals have been purchased from a single flock – in which case use the statistical table below). Also, if you have a non-accredited flock then you are required to undertake a ‘Non accredited 12 thin ewe screen’ – see last page

MV/CAE Accreditation Scheme: Numbers of Animals to Test – remember the rams

Total Number of Ewes and Rams Over 18 months	Sample Size for RPBT	Total Number of Ewes and Rams Over 18 months	Sample Size for RPBT
1 – 55	ALL	201 – 250	110
56 – 60	55	251 – 300	115
61 – 65	60	301 – 350	120
66 – 70	65	351 – 400	125
71 – 80	70	401 – 500	130
81 – 90	75	501 – 700	135
91 – 100	80	701 – 900	140
101 – 120	85	901 – 1000	145
121- 140	90	1000+	150
141 – 160	95		
161 – 180	100		
181 - 200	105		

This table is based on a 95% confidence of detecting a seroprevalence of 5%

Submission form: Non accredited 12 thin ewe screen only.

Client Name

Farm Name

1. Sample selection: Please use the following criteria to select 12 non accredited animals for testing

- All animals tested ideally should be thin (body condition 2 or less)
- Animals should have no obvious reasons for poor body condition score e.g. being broken mouthed or lameness due to foot rot.

2. Please tick any clinical signs seen in the non accredited flock (and list any others)

No clinical signs	Breathlessness	Swollen joints
Incoordination	Thin	Increased deaths
Excessive culling	Reduced milk production in ewes	Poor lamb growth rates failing to reach targets at weaning
